

MASS CENTRAL RAIL TRAIL —BOSTON TO NORTHAMPTON—104 MILES

The MASS CENTRAL RAIL TRAIL will connect to 18 other biking and walking trails

A unique feature of the completion of the MCRT is that it will enable users to explore all parts of the Commonwealth. On an experiential level, there is little to rival this in all of southern New England. Its easy access will facilitate discovery of the many unfamiliar regions of our state, many of which are somewhat isolated by geography. Large population centers in eastern Massachusetts can travel relatively short distances to experience our beautiful state. A growing list of current connecting trails and links to their websites for these connecting trails can be found here:

1. The [Alewife Brook Greenway](#)
2. The [Assabet River Rail Trail](#)
3. [Boston HarborWalk](#)
4. The [Bruce Freeman Rail Trail](#)
